

# VULCAN DATABASE

SFC House

VULCAN Administrator

VULCAN: NGB viewed database containing all NPS Soldiers in the training pipeline

6-10 days after enlistment VULCAN updates with all new Soldiers (IST included)

Information driven through TAP-DB, SIDPERS, REQUEST, DFAS, and ATRRS

Tasks within VULCAN are mandatory shipping tasks and basic Soldier tracking for use in other RSP functions

VULCAN usage is measured by NGB

Not a flawless system

## Use this one

Keep in mind that VULCAN must be updated daily by the RSP staff. At this time there are three personnel with access to update. Things will get behind in the areas surrounding SEAR, but this area is being updated.

VULCAN is down at times and updates do not take place. Updates will post from the RSP when the system is operational.

Lag time from enlistment to VULCAN cause issues due to the new soldiers not being updated for 6-10 days.

The system will show Soldiers as “issue” for anything that is not updated. The system updates on some items monthly, some weekly and some daily. If something comes up just ask the RSP.

For BNCC use the areas of concern are immediately updated by the RSP.
